Space Specifications

Wild Grapes bespoke wine rack service aims to surpass your expectations, and delight you with the results. We realise that the space which you intend for your wine rack may not be perfectly square or rectangular; indeed you may be hoping to build a rack to go under your stairs, or to make a feature of an alcove, a fireplace or a complex curved barrel vault. The possibilities are endless! The dimensions which you provide us are therefore crucial to the planning process and need to be done as accurately as possible. We would also ask you to provide us with a photograph(s) of the environment, where possible, and to answer the following questions as comprehensively as possible.

Dimensions

In the event that you are unable to provide us with a photographic image of the environment where you plan to put your bespoke wine rack, we would ask you to provide us with a sketch on a separate sheet of paper. In relation to this sketch, please measure the dimensions of the space (in centimetres) and insert the measurements in the boxes below: for example, for an under-the-stairs triangular space you will need to measure the width, height (at the tallest point) and depth of the space.

Width cm Height cm Depth cm

Please also mention whether the depth or height dimensions of the space is irregular/ curved and whether there are any power sockets or vents located within the space as this may affect the design.

Design Style and Function

Please indicate the style of racking that you require by ticking the relevant boxes below:

Contemporary Traditional
Minimalist Ornate

Please indicate whether you require any specific decorative or additional features, e.g. a gate, lock, grapevine decoration etc

If you would prefer, we would be happy to offer our suggestions on a suitable design style. Please tick the box below and (where possible) provide some background information with regard to the style of the room as it currently stands.

Not sure

Specific Materials

Please indicate whether you have specific materials in mind for the construction of your rack e.g. mild steel, stainless steel, wood, etc. Dependent upon the type of steel that you opt to use, various finishes can be achieved e.g. chrome-plating, powder coating, etc. Please indicate whether you have a particular finish in mind?

Additional Questions

Please provide the following information and answer the questions below.

Your budget

Total Bottle Capacity

Project Deadline

Which is more important; meeting the bottle capacity requested or the budget?

Should you require the rack to house a variety of bottle types (i.e. standard 75cl bottles, half bottles and Magnums), please state which types and the sort of mix required (i.e. 75 percent standard bottles and 25 percent Magnums).

Please provide any further information that you feel may be relevant regarding the design of your wine rack.
